BULBS

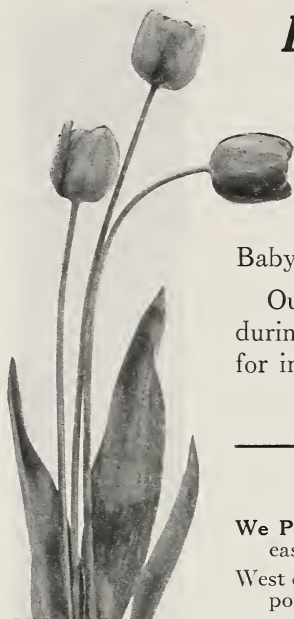

FROM GROWER TO CONSUMER

Offices, Warehouses and Plant Nurseries

BABYLON : NEW YORK

Bulb Farms: HILLEGOM, HOLLAND

From Grower to Consumer

All Tulips, Hyacinths, Daffodils and Crocus that we offer are the products of our nurseries located in Hillegom, Holland, Europe.

Peonies, Iris, Hemerocallis, etc., are grown at our Long Island nurseries, located on Albin Road, West Babylon, one and one-half miles from Babylon village.

Our Peony, Gladioli, and Dahlia fields are very attractive during summer and fall, and our nurseries are always open for inspection.

Cordially yours,

VAN BOURGONDIEBROS.

GENERAL DIRECTIONS

We Prepay all Charges on bulbs, roots, and plants to destination east of the Mississippi River, if the order is accompanied by **cash**.

West of the Mississippi River and outside of the United States, transportation will be charged to the consignee.

We will ship by Parcel Post, Express, or Freight at our own option.

Open Accounts. Financial references must be given in order to open an account, but no account will be opened for less than \$10.

Early Ordering is of great advantage, as orders are filled in rotation, and we wish to be fair to all.

Packing. All plants and bulbs will be packed with the greatest care and by experienced packers.

Growing of Bulbs and Plants. All bulbs and plants which we ship should grow, but disregard of planting instructions or delay in planting, after arrival of the bulbs and plants, are sometimes the cause for dissatisfaction.

Correspondence. We will be pleased to answer all correspondence promptly, but if you make your inquiries as brief as possible it will greatly assist us.

True to Name. Accidentally, through an unforeseen rush, we may be sold out of a certain variety, in which case we will send you a substitute of similar color and quality, with the correct name. If this is not desired, money will be refunded.

DOZEN, 100, or 1,000 RATE. We supply 6 of one variety at the rate of one dozen, 25 of one variety at the rate of 100, and 250 of one variety at the rate of 1,000.

Our Guarantee. We guarantee all our Bulbs, Roots, and Plants to grow and to be true to name, and we will replace any Bulb, Root, or Plant, prepaid, if found otherwise.

FRENCH BULBS

FOR VERY EARLY
FORCING

The four varieties named below have been grown for us by our French friends and are due to arrive in August. They can be delivered upon arrival or at the time your order is received, for immediate planting in order to have early flowers. Follow the directions given with each variety, and you will have an abundance of dainty, attractive flowers in early winter. We start our book with these bulbs as they are the earliest flowering bulbs we offer.

PAPER-WHITE NARCISSUS

Suitable for growing in water and gravel or sand

We handle only the **Giant Grandiflora** variety, which is a great improvement over the ordinary Paper-White Narcissus. It can be had in bloom from Christmas until Easter, either in pots, bowls or boxes. Upon arrival, plant them immediately, if wanted early, and put in a cool place in cellar or pit, free from frost. When well rooted they can be taken into the heat, and if watered freely they will produce an abundance of beautiful blooms. They are not hardy.

	Doz.	100
Jumbo or Exhibition Size.....	\$0 75	\$3 75
First Size, very large.....	50	2 75

GOLDEN YELLOW PAPER-WHITE NARCISSUS, SOLEIL D'OR

Soleil d'Or resembles the Paper-White Narcissus very much in habit but is of an exquisite deep yellow color, with an orange-yellow cup. The culture is the same as for the Paper-White Narcissus. We expect to have some very fine stock of this variety to meet the steadily increased demand of the last few seasons. Do not forget to order a few and get acquainted with this wonderful flower. We offer only the Exhibition Size, \$1.25 per doz., \$7 per 100.

Paper-White Narcissus

CHINESE SACRED LILY

This variety of Narcissus bears flowers of silvery white with golden yellow cups in great profusion. The bulbs are of large size and great vitality producing several spikes of flowers and a luxuriant growth. They grow well in pots but are suitable for growing in shallow bowls of water with sufficient pebbles to which they can fasten their roots, preventing them from toppling over when in bloom. They can be planted at intervals, thereby securing a succession of flowers throughout the winter.

	Each	Doz.	100
Mammoth bulbs.....	\$0 25	\$2 50	\$20 00
Jumbo bulbs.....	35	3 50	27 50

LILIUM CANDIDUM

This is the favorite Madonna Lily, which produces a large mass of snow-white flowers on straight stems. Plant some bulbs in the open in September or October, and protect them well from frost, as they are not extremely hardy, and during May or June you will have an abundance of flowers. Can also be planted in pots and by putting them in a coldframe for three months, well protected, then taking them into a greenhouse, the same success will be yours. Jumbo bulbs only, 25 cts. each, \$2.50 per doz., \$20 per 100.

Lilium candidum

6 of one variety at the dozen rate; 25 of one variety at the 100 rate; 250 of one variety at the 1,000 rate

Border of Exhibition Hyacinths

HYACINTHS

Hyacinths will grow in any good soil, but they prefer a rich light soil. The method of growing is as simple as that of tulips, but when planted in pots the top of the bulb should be 1 inch beneath the surface of the soil, and plenty of water should be given when in the house or conservatory. When planted outdoors they require about 6 inches or more of cover (preferably light) after the first sharp frost, as they are not as hardy as tulips, the cover to be partly removed after the middle of March if there is no snow.

VAN BOURGONDIEBROS.' EXHIBITION HYACINTHS

The largest Hyacinths grown in our nurseries and surpass all others.

	Each	Doz.	100
General de Wet. Immense light pink spikes resembling Grand Maitre. Very delicate.	\$0 25	\$2 25	\$14 00
Gertrude. Dark pink, compact truss. Fine for pots or bedding.	25	2 25	14 00

Single Hyacinth

SPECIAL BEDDING HYACINTHS

The Hyacinths selected for this purpose excel in vigor as well as size of truss the so-called Unnamed Bedding Hyacinths, as these are selected from our First- and Second-Size Hyacinths and are consequently very superior. Plant 8 inches apart and with at least 4 inches of soil on top of the bulb. Give them the same treatment as other Hyacinths.

MINIATURE or DUTCH ROMAN HYACINTHS

These are the Hyacinths used for growing in bulb-pans, and if planted ten to twelve bulbs to an 8- or 9-inch pan they cannot be surpassed. They are apparently small bulbs, but in comparison to their size they produce immense flowers. On account of their low price and splendid results, they are very much in demand, for house culture. By planting only one kind in a pan, the best results can be obtained, as then they produce an even growth. By following the same cultural directions as given for the large Hyacinths, failure is impossible. They are also greatly used for cheap bedding.

SINGLE RED AND PINK SHADES

	Doz.	100
Gertrude. Deep pink.....	\$0 70	\$4 50
Gigantea. Light pink.....	70	4 50

Beds of Darwin Tulips

TULIPS

The Tulip is a favorite with every flower-lover, from amateur to professional, because of its brilliant colors and ease of culture. For planting in beds in the lawn or in the borders of the walks or shrubbery, as well as in pots or pans in the house or conservatory, they are unexcelled. The single early Tulips may be forced in bloom indoors from January until Easter. These Tulips are a trifle shorter in their growth than the famous Darwin Tulips, but because of their magnificent show during the winter, they will always be in demand by every American.

Culture Indoors. They will thrive in any good garden soil, but a properly prepared soil of leaf-mold, with one-third sand mixed in, is preferable, although not necessary. If planted in pots, the tops of the bulbs must be level with the surface of the soil. Water well and store away in a cool, dark place, watering occasionally to prevent them from drying out. The best and most natural way of keeping them after potting is to bury them in the ground, with the pot or pan 4 inches beneath the surface of the ground, and, just before the winter sets in, cover them well to prevent the ground from freezing, so as to facilitate the lifting out in January in order to force them indoors. The reason for placing them in the ground after potting is in order to allow them to root in the most natural way, which is most essential for forcing. The rooting usually occurs between October and the middle of January. After taking them in from outside, keep them well watered and do not allow the lower part of the pot to get warm, as it is the top that needs the warmth. Keep them at about 50 degrees Fahrenheit for the first two weeks. For proper drainage, put a piece of broken pot in the bottom of the pot over the hole. In order to furnish continuous and steady water-supply, place the pot in a dish or saucer and fill this with water every day.

Outdoor Culture. It is most important that the soil be thoroughly loosened at least 12 to 18 inches deep, and, if possible, mix the soil with leaf-mold or old well-rotted stable manure; it is very important that the soil be as loose as possible. Plant the bulbs about 4 inches below the surface of the bed or border. After the first sharp frost, not sooner, cover the ground with 1 to 1½ inches of leaves or straw, or any other light cover, to prevent the frost from penetrating below the bulbs. After the danger of hard frost is over in the spring, take off the cover, being careful not to break the new tops, which will have grown through the cover. We have reduced the number of varieties greatly and have compiled a list of the best, most distinct, and leading Tulips only, as many differ only slightly from others.

SINGLE EARLY TULIPS

For forcing in pots or pans during winter, or early spring-flowering outdoors
MUST BE PLANTED BEFORE THE MIDDLE OF NOVEMBER

NOTE.—The letters E, M, and L, following each variety indicate their relative earliness of blooming. E indicates Early; M, Medium; L, Late, although, with a few exceptions, most varieties bloom about the same time when planted outdoors, the late ones coming into bloom when the early ones are fully out. The figures indicate the height in inches.

	Doz.	100	1,000
Artus. L 10. Bright scarlet. For bedding only.....	\$0 60	\$4 00	\$35 00
Belle Alliance. M 11. Brilliant scarlet; large flower. Excellent forcer as well as bedder.....	75	4 50	40 00

Goldfinch. M 11. An unfading golden yellow, making it a wonderful Tulip for bedding.....	75	4 50	40 00
Grace Darling. Brilliant bronze-scarlet, yellow base.....	75	4 50	40 00

Bed of Single Early Tulips

Ibis. Dark, brilliant pink. 30 cts. each, \$3.50 per doz.,

Joost Van Vondel. M 12. Cherry-red with white stripes in center of petals. Very attractive; good bedder and forcer. 75 cts. per doz., \$4.50 per 100, \$40 per 1,000.

Joost Van Vondel White (Lady Boreel). M 13. Snowy white flower of very large size and handsome shape, making it an excellent bedding variety. Slow forcer. 75 cts. per doz., \$5 per 100, \$45 per 1,000.

Keizerkroon. E 15. Crimson-scarlet, with very attractive golden yellow edge. Can be seen at a great distance and is one of the most popular bedding Tulips. Large flower. Excellent forcer. One of the best. 75 cts. per doz., \$5 per 100, \$40 per 1,000.

King of the Yellows. E 14. The name indicates its quality as well as its color, and it is fully deserving of that name. Extra forcer. 75 cts. per doz., \$4.50 per 100, \$40 per 1,000.

La Reine. M 12. White, shaded pink when in full bloom. A very pretty variety and millions are used by florists for forcing and cut-flowers. Fine for bedding. 75 cts. per doz., \$5 per 100, \$40 per 1,000.

La Reine Maximus. White, shaded rose. 80 cts. per doz., \$5.50 per 100, \$50 per 1,000.

Le Matelas. E 12. A very fine pink variety which is very easily forced. Comparatively new, but one of the best. 85 cts. per doz., \$5.50 per 100, \$50 per 1,000.

SINGLE EARLY TULIPS, continued

Le Reve (Hobbema). Old-rose, buff suffusion. \$1 per doz., \$6.25 per 100, \$60 per 1,000.

L'Immaculee. M 12. Pure white. Fine bedder. 60 cts. per doz., \$3.75 per 100, \$30 per 1,000.

McKinley. M 12. Brilliant red. Specially fine when planted in a large bed. 75 cts. per doz., \$4.50 per 100, \$40 per 1,000.

Mon Tresor. E 12. A golden yellow of great merit, not only because of its brilliant color, but also for its large size and extra-early forcing quality. 85 cts. per doz., \$5.50 per 100, \$50 per 1,000.

Pink Beauty. M 12. Bright cherry-rose, slightly striped white, harmonizing perfectly and making a very fine show if a whole bed is planted with this variety. 80 cts. per doz., \$5.50 per 100, \$50 per 1,000.

President Lincoln. Pale violet, with light edge. 75 cts. per doz., \$4.50 per 100, \$40 per 1,000.

Prince of Austria. M 14. Large, brilliant orange-scarlet flower borne on tall stems. Fine forcer; also pleasing in a bed. 75 cts. per doz., \$4.50 per 100, \$40 per 1,000.

Princess Marianne. M 11. Snow-white flower, with a very delicate and handsome red stripe through the center of the petals. An enormous flower. For bedding only. 75 cts. per doz., \$4.50 per 100, \$40 per 1,000.

Proserpine. E 14. Rose-carmine; large flower. Undoubtedly one of the easiest and earliest forcers of all Tulips except Duc van Thol Scarlet. Very beautiful and most popular. \$1 per doz., \$6.50 per 100, \$60 per 1,000.

Rising Sun. Golden yellow. \$1 00 \$7 00 1,000

Rose Luisante. L 10. Deep rose-pink of great brilliancy; large flower. A most gorgeous bedding Tulip. Forces beautifully if placed in moderate temperature. 90 5 50 \$50 00

Le Reve (Hobbema) Tulip

Rose Precoce. E 10. Our own introduction in the United States. A beautiful light pink Tulip of great merit because of its size and earliness. The earliest of all pink Tulips for forcing. A very fine variety. \$1.50 per doz., \$10 per 100, \$80 per 1,000.

Rose Gris-de-Lin . M 11. A large flower of a lovely light pink color, suitable for both indoor and outdoor planting.	Doz.	100	1,000
Sir Thomas Lipton . Brilliant crimson.	\$0 75	\$4 00	\$35 00
Thomas Moore . E 14. Beautiful apricot, with dull orange-yellow edge; sweet scented. A beauty when forced. Is also a very handsome cut-flower, as it has a very long stem.	75	4 50	40 00
Van Der Neer . M 12. Deep purple. Beautiful shape and color.	60	3 75	30 00
Vermilion Brilliant . E 12. Bright glittering scarlet with yellow base; long flower of exquisite beauty. Forces very easily and early. One of the best scarlets.	1 25	8 00	75 00
White Beauty . Pure white Pink Beauty.	90	5 50	50 00
White Hawk . M 12. Of all white Tulips this variety is the most handsome and suitable for all purposes.	1 75	12 00	
White Swan . L 14. A splendid bedding variety. Large, white, egg-shaped flower, yellow base. For outdoors only.	75	5 00	45 00
Wouwerman . M 12. Large rich dark purple flower. Planted in a bed with Rose Luisante makes a most gorgeous show.	75	4 50	40 00
Yellow Prince . M 12. Clear golden yellow of extremely good quality. Fine for forcing and bedding. Millions of these are grown every year.	1 25	8 00	75 00
	75	4 50	40 00

Van Bourgondien Bros.' Extra Mixture. We grow this mixture specially in our nursery to ascertain that they contain all possible shades and colors. 50 cts. per doz., \$3.50 per 100, \$25 per 1,000.

DOUBLE EARLY TULIPS

These require the same treatment as the Single Early Tulips, but are slower in forcing and therefore require a lower temperature in January and February to secure the best results.

Couronne d'Or Tulip

Mr. Van Der Hoef. Golden yellow. \$1 per doz., \$7 per 100, \$65 per 1,000.

Mr. Van Tubergen. Golden yellow Couronne d'Or. 50 cts. each, \$5 per doz.

Murillo. M 12. Delicate pink; extra-fine for beds or borders. This variety undoubtedly is the finest pink for forcing, and we sell millions of them every year for that purpose. We recommend this variety as it is considered the best light pink double Tulip. We are in a position to give you bulbs which will produce the best flowers as we have several acres of stock. 75 cts. per doz., \$4.50 per 100, \$40 per 1,000.

	Doz.	100	1,000
Peach Blossom. Bright rose Murillo.....	50 cts. each.	\$5 00	
Schoonoord. M 12. A pure white sport of Murillo with all its good qualities...	75	\$4 50	\$40 00

GIANT DARWIN TULIPS (May-Flowering)

THE PRIDE OF THE GARDEN

These Tulips have created a real sensation for the past few years, and one really does not wonder when seeing them in full bloom. They got their reputation through merit alone. They are most brilliant in color and of the greatest variety of shades. Each flower is extremely large, thereby producing a most gorgeous show in any garden, either in beds, borders, or among shrubbery. With the exception of a few varieties, they are not very satisfactory indoors, and one must be an expert grower to flower them in the house at all, but they never fail outdoors.

TWELVE OF THE MOST DISTINCT VARIETIES

	Doz.	100	1,000

Border of Narcissi

NARCISSI OR DAFFODILS

In order to have a beautiful bulb-garden, Narcissi should be planted very freely. They thrive in practically any climate in the United States and it is small wonder that the demand is doubling every year. They are not only excellent for outdoors, but millions are used every year for forcing indoors. Their graceful form, beautifully shaped trumpets and cups, and the long, straight stems have made them favorites for cut-flower purposes with every American gardener. We have compiled a list (as short as we could make it) of the best and most attractive varieties for indoor, outdoor, and exhibition purposes, and it is complete and easy to select from.

Culture. The same as for Tulips, although they should be planted as close as possible in the pots or pans. After active growth commences, give plenty of water.

Culture Outdoors. They should be planted so that the top of the bulb is at least 5 inches beneath the soil. A little protection should be given during severe winter weather, although they are perfectly hardy.

In our descriptions we use the following terms: **PERIANTH**—the outer petals of the flower. **TRUMPET**—the long cup- or trumpet-shaped center. **CROWN** or **CUP**—the short or flat center.

MAMMOTH TRUMPET DAFFODILS

The flowers of this class have enormous trumpet-shaped cups and widely expanded perianths, often measuring 4 inches in diameter. The flowers are borne on strong, straight stems, sometimes 12 to 18 inches in length. Considered fine for planting among shrubs.

Emperor (Lorifolius). Deep primrose perianth, with rich yellow trumpet. Very large and one of the best of all yellow Daffodils, as it produces three or more flowers to one bulb. Jumbo, 80 cts. per doz., \$6 per 100, \$55 per 1,000; Mammoth, 70 cts. per doz., \$5 per 100, \$45 per 1,000.

Empress. (Bicolor.) Pure white perianth with deep yellow trumpet. As strong a grower as Emperor. Jumbo, 80 cts. per doz., \$6 per 100, \$55 per 1,000; Mammoth, 70 cts. per doz., \$5 per 100, \$45 per 1,000.

Golden Spur. The best of the golden yellow Daffodils. Perianth and trumpet bright golden yellow. Fine for the garden, but best for house or conservatory. The sale of this variety exceeds all other yellow Daffodils. Jumbo, 80 cts. per doz., \$6 per 100, \$55 per 1,000; Mammoth, 70c. per doz., \$5 per 100, \$45 per 1,000.

Narcissus, Golden Spur

Narcissus, Victoria

Mrs. Langtry. (Leedsii.) A wonderfully free-flowering variety of exquisite primrose-white. It is splendid for massing and fine for naturalizing, millions being used yearly for that purpose. The color is very attractive. 60 cts. per doz., \$3.50 per 100, \$30 per 1,000.

Lucifer. Large white petals with brilliant red cup, which makes it very conspicuous..... \$0 70 \$5 00 \$45 00

Sir Watkin. (Incomparabilis.) Immense light yellow perianth, with deep yellow cup about 1 inch long. Tall, strong grower..... 80 6 00 45 00

White Lady. (Leedsii.) Pure white perianth; canary-yellow cup, fringed at the edge. Fine for bedding..... 75 5 00 45 00

POETICUS NARCISSI

Almira (King Edward VII). Snow-white petals and well-shaped, red cup..... 85 6 00 55 00

Glory of Lisse. Large form of Poeticus ornatus..... 75 5 50 50 00

MAMMOTH TRUMPET DAFFODILS, con.

Glory of Leiden. Pale yellow perianth; long and wide open golden yellow trumpet. A very large flower. \$1.25 per doz., \$7.50 per 100.

King Alfred. The largest, rich golden trumpet Daffodil in existence. A very high-class variety of great beauty. 40 cts. each, \$4 per doz., \$25 per 100.

Madame de Graaff. Pure white perianth with trumpet of delicate primrose-white, turning to pure white. The best white Daffodil. \$1.25 per doz., \$7.50 per 100.

Princeps. Canary-yellow perianth, with golden yellow trumpet. A great variety for cutting on account of its stiff stem and foliage. 70c. per doz., \$5 per 100, \$45 per 1,000.

Victoria. (Bicolor.) Pure white perianth; golden yellow trumpet.

Bears a profusion of flowers. Strong grower and matchless for forcing; fine for bedding. A splendid variety for massing. Jumbo, 80 cts. per doz., \$6 per 100, \$55 per 1,000; Mammoth, 70 cts. per doz., \$5 per 100, \$45 per 1,000.

MEDIUM TRUMPET, BARRII AND LEEDSII

Conspicuus. (Barrii.) Large, broad, pale yellow perianth; deep yellow cup, with bright scarlet edge. Fine for massing. 70 cts. per doz., \$5 per 100, \$45 per 1,000.

Narcissus, White Lady

POETICUS NARCISSI, continued

Ornatus. This is the improved Poeticus. It is unexcelled for indoor planting as well as garden purposes. The snow-white perianth, with scarlet eye, is very attractive. Fine for naturalizing.....	Doz.	100	1,000
Pheasant's Eye. Snow-white perianth, with attractive scarlet eye; very sweet-scented and a great variety for naturalizing. Cannot be grown indoors.....	\$0 65	\$4 00	\$35 00

CROCUS

Among the first flowers to appear after the snow leaves the ground is this old-time favorite, the Crocus. They are exceptionally attractive when scattered in a lawn or planted in rows bordering a bed. When scattered in the lawn the grass can be mowed without harm to the Crocuses. They can be grown in pots or bulb-pans, and, if planted very close, they produce a very pleasing effect. Outdoors plant about 2 inches beneath the surface of the soil and in pots about 1 inch. They are hardy outdoors; if forced, keep a medium temperature.

NAMED CROCUS

35 cts. per doz., \$2.25 per 100, \$20 per 1,000

Albion. Large blue flower, with white stripes.

Cloth of Gold. Yellow with golden stripes; free-blooming.

Cloth of Silver. White, with silvery light blue stripes.

King of the Whites. Large pure white flower.

Marie. Very attractive light blue; very free-flowering and a good all-round variety.

Maximilian. The finest light blue.

Mont Blanc. Pure white.

Sir Walter Scott. White, with blue stripes.

Yellow. The mammoth Crocus with more flowers at one time than any other variety. Orange-yellow. Extra fine.

Crocus grown in pot

FREESIA, "PURITY"

(CALIFORNIA-GROWN)

This is the pure white flower with light yellow blotch

We are pleased to say that at the time this Catalogue went to press the crop of Freesia, "Purity," of our California grower looked very promising, and we will be able to supply you with the best-grown bulbs of this exquisite white variety. We can ship these upon receipt of order. This is one of the most fragrant flowers known, and its odor is extremely sweet.

Freesia, "Purity"

CALLA LILIES

(CALIFORNIA-GROWN)

This is a very satisfactory bulb for winter forcing in a warm place, and often has produced ten to twelve large flowers in succession, especially if the atmosphere is moist. They like a stiff, heavy soil and a feeding of liquid manure once a month. Plenty of water must be given.

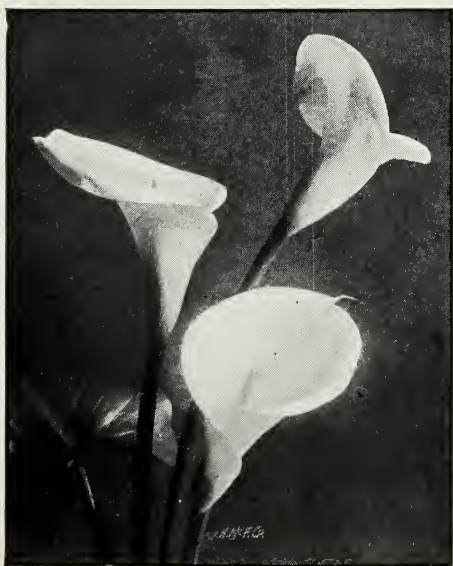

Plant from one to three bulbs in an 8-inch pot and place the crown of the bulb level with the soil, keeping the soil at least 1 inch below the brim of the pot.

The Yellow Calla is also a favorite for the house or conservatory, as the color is a rich golden yellow. The green foliage of this variety has bright white spots. Neither the white nor the yellow varieties are hardy and can only be planted outdoors in the spring of the year.

Plants for September Delivery and Planting

The **HEMEROCALLIS**, **IRIS** and **PEONIES** should be planted upon delivery in September.
Please order early

Planting of Hemerocallis

HEMEROCALLIS (Yellow Day Lily)

Specially fine for September planting

Hemerocallis has long been popular in our gardens, and it surely is one of the most desirable hardy plants, every variety being of exquisite beauty. The tall, graceful foliage harmonizes well with the large yellow or orange, lily-shaped flowers and adds much to their beauty. They are perfectly hardy, growing in practically any garden soil, and are particularly adapted for naturalizing, even in partly shaded places. We can offer the best six and most popular kinds, among which you will find the famous variety, Dr. Regal, the best of all.

Planting of German Iris

A Word About Iris and Peonies

It has been the experience of many that Irises or Peonies planted in the spring will not bloom the first season, and we recommend September planting, not later. This rule applies to a great many varieties of plants, for instance, Hemerocallis and several others. If you order plants from us, we will ship in the right planting season, in other words, we help those who are in doubt about "When to Plant."

IRIS GERMANICA

These beautiful Irises bloom early in the spring when the bulbs have just finished blooming, and because of their great variety of colors, they make a magnificent show. They are perfectly hardy and thrive in almost any soil, especially where they are exposed to the full sun. No home-garden is complete without a few clumps scattered about, and they are also excellent for massing and bordering.

We quote only the best old varieties and new ones.

To simplify making a selection, we have classified them with the following abbreviations:

GERMANICA, Ger. May-flowering; earliest of all.

PALLIDA, Pall. Tall growers with large, sweet-scented, blue, lavender, and purple flowers.

AMGENA, Am. Standards white; falls various shades.

NEGLECTA, Neg. Standards range from lavender to purple.

PLICATA, Pli. Flowers have a frill-like lilac margin on a white ground.

SQUALENS, Sq. Standards are clouded shades of copper, bronze, and fawn.

VARIEGATA, Var. Standards are various shades of yellow.

In the description, **S.** represents standard or upper petals; **F.** falls or lower petals

Lutea. Creamy yellow.....	25	2 50
Schneekuppe. S. pure white; F. white, center veined greenish yellow. 8 in.....	35	3 50

IRIS SIBIRICA

This variety is, without a doubt, the most delicate and elegant of all the small-flowering Irises. It has narrow grass-like foliage, with tall stems and flowers of the most delicate shade of white and blue. It is very free flowering and especially fine for cutting.

	Each	Doz.
Orientalis. Intense brilliant blue... \$0 10	\$0 10	\$1 00
Orientalis, Snow Queen. Snow-white..... 10	10	1 00

Iris pumila

Border of Japanese Irises

JAPANESE IRIS (*Iris Kaempferi*)

This queen of the large-flowering Irises is very attractive. It flowers a little later than the German Irises, which adds greatly to its popularity. The flowers are of an enormous size and there are single and double varieties, both being equally attractive and suitable for cut-flowers, as they really develop into a more perfect bloom if they are cut just before the bud opens and placed in the house in fresh water. The best time to plant these Irises, like all other Irises, is September, to allow them a fair time to make new roots before the winter sets in.

COLLECTION A. 6 plants in 6 of the best varieties, \$1.50.

COLLECTION B. 12 plants in 6 of the best varieties, \$2.75.

EXTRA-FINE ASSORTED, SINGLE AND DOUBLE. \$1.75 per doz., \$12 per 100.

The secret of success in the growing of Irises is to start them in a well-enriched, mellow loam where plenty of moisture is available in summer. Retain the moisture as much as possible by maintaining a soil mulch; do not permit the ground to become baked or hard, for water evaporation from the soil goes on rapidly when a hard crust tops it.

Border of Herbaceous Peonies

PEONIES

We cannot say enough about the beautiful Peony, for it surpasses most of the spring plants in variety and richness of colors and in its ornamental foliage.

What Size to Plant. The rule of "The best is the cheapest" especially applies to Peonies, and to obtain the greatest success the first season, plant the largest plants we offer, as they are well worth the difference in price.

Time to Plant. Plant in September to produce a good effect the first season and use heavy plants. The result will be astonishing.

Culture. This is very simple indeed. Loosen the ground thoroughly and liberally where the Peony is to be planted and, if possible, mix some old well-decayed cow-manure or leaf-mold with the soil. Under no circumstances mix fresh manure with the soil, but save this to cover the ground around the plant the following spring.

Protection. Before winter sets in, cover the ground about the plants with about 4 inches of leaves, to protect the newly made fibrous roots. This has prevented many failures and disappointments.

PÆONIA OFFICINALIS

This class of Peonies blooms a long time before the *Pæonia chinensis* and therefore makes a great showing in a hardy border or in groups where other Peonies are planted also. The flowers are very attractive, and although the stems are a trifle shorter than those of the Chinensis, they are still plenty long for cutting purposes.

Officinalis mutabilis alba. Pure white.....	Each \$0 75
Officinalis rosea. Soft pink; very fine.....	50
Officinalis rubra plena. Large; brilliant crimson.....	50

SPECIAL COLLECTION. One plant each of the above 3 named varieties, \$1.50

PEONY COLLECTIONS

Any variety in these collections may be ordered separately

These three collections have been made up with great care and include the most distinct colors and the finest shades. We have divided them in Early, Midseason, and Late, so that Peony-lovers may have the enjoyment of seeing the various shades blooming at one time. We have not put the cheap varieties together, nor the most expensive ones, as we want every Peony-lover to have the best and more expensive varieties as well as the less expensive. In order that our patrons may have the finest show all through the season, we combine the three collections at a reduced rate.

IN OUR COLLECTIONS WE INCLUDE ONLY OUR EXTRA-LARGE SIZES

THE ABOVE 3 COLLECTIONS COMBINED, 24 PLANTS, IN EXTRA-STRONG ROOTS, \$32

WE issue a new list or Catalogue of various bulbs and plants every season at the right planting time.

FOR INSTANCE:

This Catalogue is for bulbs and plants to be planted in August or early September, and for bulbs for fall planting.

In the spring we issue our Catalogue of Gladioli, Dahlias, Canna Roots, and other bulbs, roots and plants, etc., for spring planting.

Please keep this in mind and if you do not receive your Catalogue in season, ask for a copy.
